

„Crossing Borders, Transcending Boundaries: Introduction to Engaged Research, Transfer and Stakeholder Engagement“

Duration: 10 hours, 2 days

Target group: Early career researchers that are interested in the transfer potential of their own research and keen to collaborate with actors from outside academia – as well as researchers that would like to reflect on and expand already existing collaborations.

Facilitation Language: English or German

Content

- Who are the actors of an innovation eco-system. What are their specific roles? What is the role of science in this eco-system?
- What are benefits of a collaboration with actors from outside academia – for society and for your own research?
- What do I have to consider when working with actors from civil society, policy making and economy? What are the challenges and how can I tackle these challenges?
- How to bring about a mutual relationship regarding the transfer of ideas, knowledge and technology?
- Related concepts of the European Commission: “Open innovation”, „Mission-Oriented Research“, „Impact- and Challenge-Driven Research“ or „Participatory Action Research“.
- Interactive part of the workshop: Towards a “contextualization” of science in knowledge societies: Why, how, with whom? How can I collaborate with actors from outside academia and make my research usable for different target groups?
