

**START THE
DIALOGUE –
OPEN UP
SCIENCE!**

**PUBLIC ENGAGEMENT
TRAININGS:
ENGAGE SCIENCE!**

**From Knowledge-Production
to Science-Society Dialogues**

**OUR WORKSHOPS OFFER VALUABLE SKILLS AND
PRACTICAL TOOLS FOR EARLY CAREER SCIENTISTS
FROM ALL DISCIPLINES.**

After the trainings they will be able to meet some of the key challenges for 21st century researchers: Engagement, Openness and Participation.

Applying a set of interactive methodologies, the trainings will encourage scientists to reflect the following questions:

- What are the benefits and risks of engaging with multiple publics?
- How can I integrate participative elements into my research?
- How can I organize and facilitate citizen- and stakeholder dialogues?
- What kinds of public engagement formats exist – and what can I learn from them?

IDEA AND CONCEPT

Every training starts with a qualified input provided by internationally experienced speakers. The number of experts can vary from 1 to 3. The input section is followed by an interactive session in which the participants will learn and practice new tools and skills they can apply in future research projects and funding proposals.

We offer trainings in English or German for 15 - 40 participants. The costs for each training depend on the size, format and the length of each workshop – we can design trainings between 0,5 to 2 days. Individual offers can be provided upon request.

The trainings can be held in universities, research institutions, doctoral schools or other venues. Target groups are early career researchers from different backgrounds.

ABOUT THE ORGANIZER:

city2science is a German company for science communication and strategic consulting. Based on many years of experience in the fields of city-management and science communication, city2science supports local stakeholders, policy makers, universities and scientific institutions by providing innovative communication strategies and trainings connecting science, city and society.

CEO Annette Klinkert is an internationally renowned expert in science communication and public engagement. Since 2016 she is the Executive Director of the European Science Engagement Association, EUSEA (www.eusea.info).

From 2015 until 2019 Annette Klinkert is Project Manager of the HORIZON 2020 project on Responsible Research and Innovation „NUCLEUS“ (www.nucleus-project.eu).
